Abstract of JP 2003132224 (A)

PROBLEM TO BE SOLVED: To provide an automatic saving system and automatic saving method for automatically saving a part of the sum of money to be withdrawn when withdrawing deposit money from the account of a financial institute.

SOLUTION: This automatic saving system and method comprises user terminals 10, 23 and 24 connected to a financial institute system (saving system center) 21 through a communication network 100. The financial institute system comprises an automatic saving processing means 21a for automatically saving a part of the sum of money to be withdrawn designated by a user through the user terminal 10, 23 when the user withdraws the deposit money from the financial institute account provided in the financial institute system. Accordingly, when the user withdraws, for example, 10,000 yen from its own financial institute account, 1,000 yen can be automatically saved as a fixed amount.
